

# KEY NOTES

January 27, 2012

Finelite MURO, introduced earlier this month, is the first luminaire designed to use the energy efficient LED T8 lamp technology from Osram Sylvania. The clean extruded aluminum housing comes in 3 forms: oval, circle, and square. MURO delivers 1296 lumens at ~23 watts, a 40,000 hour light engine and driver, with field replaceable “lamp” (sustainable design), and pendant or wall mounting options, making it a perfect solution for your interior vertical wall applications. Philips DayBrite presents DuaLED an efficient recessed LED 2 x 2. It was designed with soft opal diffusers to create comfort in the space. A sleek profile at only 2 11/16 inches deep allows this fixture to be used in virtually any plenum space. Four lumen packages from 2,700 to 4,400, 0-10v dimming, and integral emergency options are available to meet application requirements. This flexibility can help lower the number of luminaires used reducing overall installation costs. <http://www.daybrite.com/brochures/154.pdf>

Hanover Lantern is now represented by KEY Lighting. Hanover has been in the exterior lighting business since 1970. They manufacture product for residential, commercial, and landscape use. Many traditional shapes are being updated with newer more energy efficient lamp technology and new designs are being released regularly. Hanover Lantern is great with custom too. They can take a napkin drawing and produce a high quality, made in the USA, custom fixture for your customers. <http://hanoverlantern.com/HanoverLantern/Public/ProductDetail.aspx?pid=3951&s=>
